

## **Kleagiene Professional Brand Microfiber Use and Care Instructions**

### **Commercial Laundry Guidelines**

Kleagiene Professional branded microfiber cloths, mops and mop pads:

- Recommended water temperature for washing machines: 200°F / 93°C
- Recommended temperature for drying machines: 130°F / 54°C
- Kleagiene Professional microfiber is bleach safe.
- Kleagiene Professional microfiber meets or exceeds CDC laundering requirements.

### **8-Sided Cleaning Technique – Instructions**

Kleagiene Corporation recommends using the 8-Sided cleaning technique when cleaning with microfiber cloths. Follow these steps:

- 1). Start with a clean, Kleagiene Professional microfiber cloth.
- 2). Fold the cloth in half.
- 3). Fold the remaining cloth in half again, resulting in a square shaped cloth with 4 layers.
- 4). Clean surfaces with the exposed two sides of the microfiber cloth.
- 5). Open the microfiber cloth once and refold, exposing two clean sides. Continue cleaning.
- 6). Open microfiber cloth fully when the first 4 sides have been used and refold to expose 2 clean sides. Continue cleaning.
- 7). Open microfiber cloth one final time, exposing the remaining 2 clean sides. Continue cleaning.

### **Color Coded Cleaning**

Kleagiene Corporation offers microfiber cloths in blue, green, yellow and grey colors and offers microfiber flat mop pads with blue, green, yellow and grey tabs. These colors can help end user's organize which cloths and mops are to be used in specific areas. Using designated colors in specific areas or for specific tasks may help reduce cross-transmission and improve results. Follow your facilities' safety protocols and consult available industry resources for additional information on color coding.
